

NAMIC® Fluid Management Systems Catalog and New Brochures Available

Navilyst Medical is pleased to offer two new Fluid Management brochures and a product catalog. Inside the new publications you will find features and benefits as well as crisp imagery of NAMIC Fluid Management Systems for Vascular and Radiology Labs as well as the Cardiac Catheterization Lab. These publications detail the flexibility, quality and choice available to the Vascular, Radiology or Cardiac Catheterization Lab. In today's dynamic medical environment, there's no time to question device quality or the utility of the set-up. NAMIC® Fluid Management Systems are constructed for confidence in angiographic procedures.

Since 1969, NAMIC Products have been the most widely used in the industry. With features that answer clinical and operational needs, NAMIC products meet the true challenges of your Cardiac Catheterization or Radiology Lab.

The most trusted line of products is also the most flexible. NAMIC Kits are assembled to your specifications to meet your standards of care. Optimize your set-up with the Squeeze Contrast Controller™, Compensator™ Manifold and Closed Fluid Systems. You can feel confident with NAMIC Products in your lab and Navilyst Medical as your partner in patient care.

NAMIC Fluid Management Products include:

- **Squeeze Contrast Controller™:** Maximize your budget, reduce contrast waste safely and effectively
- **NAMIC Compensator™ Manifold:** Readings at any level, easier operation, increased waveform fidelity
- **NAMIC Angiographic Control Syringes:** Most proven, most trusted, #1 choice of Cath Labs
- **NAMIC Protection Station®:** Proven blood contact protection, best practice solution, easy-to-use
